

# Mix Oil<sup>®</sup>

## Plus Plus

### HIGH TECHNOLOGY FROM NATURAL SOURCES

A.W.P. vision of a sustainable future means our children and grand children will be living in a world that values human creativity, diversity and individual choice.

Business will harness human and material resources without devaluing the integrity of the individual or the planet's ecosystem.

**Mix Oil plus plus** is a dream come true.

This product is increasingly required and used instead of antibiotics: that means an improvement of animal breeding and consequently of human health.

A word cloud containing the following antibiotic names: Furazolidone, Tetracyclines, Tylosin, Colistin, OTC, Tiamulin, Spyramicin, Monensin, Avilamycin, Penicillin, Lincomycin, GTC, Tylosin, Flavomycin, Monensin, Avilamycin, Spyramicin, Tetracyclines, Gentamicin, Lincomycin, Tylosin, Colistin, OTC, Tiamulin, Spyramicin, Monensin, Avilamycin, Penicillin, Lincomycin, GTC, Tylosin, Flavomycin, Monensin, Avilamycin, Spyramicin, Tetracyclines, Tylosin, Tiamulin, Flavomycin, Gentamicin, GTC, Tylosin, Colistin, Lincomycin, Penicillin, Monensin, Avilamycin.

**Mix Oil<sup>++</sup> is a unique blend of essential oils, organic acids and fatty acids designed to be a very strong antibacterial product.**

**Mix Oil<sup>++</sup> can be used in all phases for broilers, layers and breeders.**

**Mix Oil<sup>++</sup> is available in powder or liquid form (water-dispersible).**

**Mix Oil<sup>++</sup> has no contraindications due to its natural composition.**

## Synergy

Mix Oil<sup>++</sup> is a unique product able to inhibit pathogens and improve animal health.

## Benefits:

Can be used on antibiotics free production.

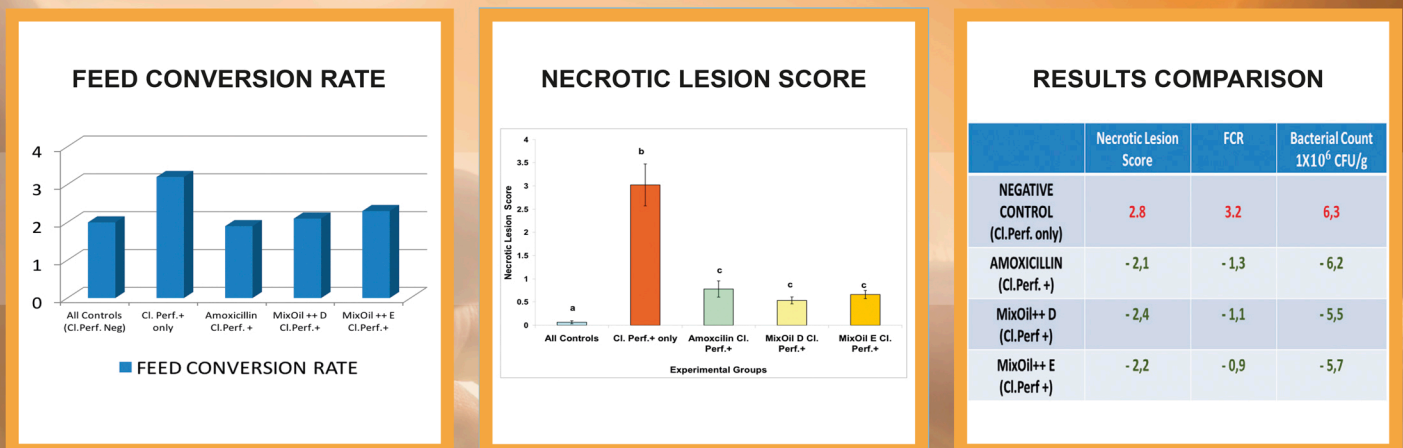

High safety product due to its natural composition.

Can be mixed in combination with other feed additives or medications.

Better general growth performance.

Here university trials to confirm the results got on the field on broilers:

COMPARING THE EFFICACY OF Mix Oil<sup>++</sup> WITH AMOXICILLIN (0,12 g/L) *in vivo* in 19 DAY'S BROILERS CHALLENGED WITH 1,2X 10<sup>9</sup>CFU of *Clostridium Perfringens*
